- Configure Ingest Modules:
- Autopsy allows you to select specific analysis modules such as File Type Identification, Keyword Search, Hash Lookup, etc.
- You can enable or disable these based on your investigation needs.
- Start Analysis: Click Next to start the analysis.

4. Initial Analysis and Overview

- Ingest Progress: As Autopsy processes the data source, you'll see the progress in the lower-left corner.
- Explore the Resulting Artifacts:
- Autopsy automatically categorizes findings such as web artifacts, file system metadata, and communication records.
- Use the Tree Viewer:
- On the left pane, you'll see a tree structure where you can explore different aspects like File System, Web History, Email, etc.

5. Detailed Analysis

- Keyword Search:
- You can perform specific keyword searches using the Keyword Search module.
- Use pre-configured lists or enter custom keywords. ○
- File Analysis:

- Navigate through files and folders under the File Types or File System section.
- Open, view, or export files for further examination.
- Timeline Analysis:
- Use the Timeline module to visualize events based on timestamps.
- This can help track user activity over time.
- Hash Analysis:
- Compare file hashes with known databases to identify known good or bad files.

6. Reporting

- Generate a Report:
- After analyzing the data, click on Generate Report from the toolbar.
- Choose the type of report (HTML, CSV, Excel, etc.).
- Select which parts of the analysis you want to include in the report.
- Export Findings:
- Export individual files or artifacts that you need for your report or further analysis.
- Final Review:
- Review the report to ensure it includes all relevant information.
- Save or print the report for use in your case.

7. Case Closure

- Close the Case:
- Once you have completed your investigation, close the case within Autopsy.
- Archiving:
- Ensure all data and reports are properly archived according to your organization's policies.

8. Advanced Features (Optional)

- Custom Ingest Modules:
- Autopsy allows for custom modules to be added if you need specific analysis tools not included by default.
- Collaboration:
- Autopsy can be configured for multi-user cases if you're working in a team environments
